

Greensboro Trails & Greenways

Trails & Greenways Coming Soon...

The City's [BiPed Plan](#) recommends more than 400 miles of trails and greenways for the Greensboro area. [Greensboro Parks & Recreation](#) works with local volunteers, [GDOT](#), [Guilford County Parks & Open Space Program](#) and other local / national organizations to develop more trails and greenways in our community. Here are our most current projects under development:

Blue Heron Trail Phase II - This mountain biking and hiking trail begins at Yanceyville Street across from the recently added Blue Heron trailhead. Our newest Watershed Trail will skirt Lake Townsend's shore and make its way to Doggett Road and beyond. The trail is being constructed by volunteers of the [Greensboro's Fat Tire Mountain Biking Society](#).

Downtown Greenway - This greenway will loop around downtown Greensboro and will be made up of on and off street greenway links. The first quarter mile of this trail is complete from the Freeman Mill Boulevard exit ramp at Lee Street to Eugene Street. Eventually, it will connect to the Atlantic & Yadkin Greenway, completing a route from downtown Greensboro to Summerfield. [Visit the Downtown Greenway website.](#)
